Tamilarasan G

Python Full Stack Development Engineer

+91-7339608629 tamilarasang17@gmail.com https://www.linkedin.com/in/tamilarsan071

Summary

Software Development Engineer with strong proficiency in Data Structures and Algorithms (solved 200+ problems on GeeksforGeeks). Hands-on experience in Java, Spring Boot, Python, FastAPI, MERN Stack, SQL, RESTful APIs, MongoDB, and full-stack development. Skilled in building scalable applications, optimizing database performance, and writing clean, maintainable code in Agile environments.

Skills

Programming Languages: Python, Java , JavaScript
Backend Technologies: Fast Api ,Spring Boot,JWT Authentication, Express.js, RESTful APIs
Frontend Technologies: React.js, HTML5, CSS3, Tailwind CSS
Databases & Tools: MySQL, MongoDB, JDBC, Git, GitHub
Core CS Concepts: Data Structures, Algorithms, Object-Oriented Programming, Database Design

Experience

Java Full Stack Development Intern **March 2026 – May 2026**
Infotact Solutions, Remote *Tools Used: Java, Spring Boot, React.js, MySQL, Docker*

- Developed **2 real-world full-stack web applications** using Java Spring Boot, React.js, and MySQL, implementing scalable RESTful APIs and responsive user interfaces.
- Enhanced application security and role-based access control by implementing **Spring Security and JWT**-based authentication and authorization mechanisms, securing **10+ protected API endpoints**.
- Collaborated with a **4-member cross-functional team**, taking the lead in resolving technical issues, clarifying teammates' doubts, and coordinating feature delivery using Agile methodologies.

Full Stack Development Intern (Python) **June 2023 – July 2023**
Live Stream Technologies, Coimbatore *Tools Used: Python, HTML, CSS, JavaScript*

- Designed and developed **3+ scalable web applications**, improving system performance by 30% through backend optimization.
- Built and integrated **5+ RESTful APIs**, reducing data retrieval time by 40% via optimized database queries.
- Communicated technical designs and progress updates with cross-functional teams and stakeholders during daily stand-ups, ensuring alignment on feature delivery timelines.

Projects

Online Movie Booking System | *React Js, Tailwind Css, Python ,Fast Api, Express.js, MongoDB* |

- Implemented a BookMyShow-style full-stack booking platform independently in 25 days, supporting 50+ locations across Tamil Nadu with 5+ available slots per venue.
- Structured backend workflows for booking confirmations, including automated email notifications with booking details via Resend, cutting processing time by 40%.
- Introduced JWT-based authentication with email OTP verification and availability validation logic to eliminate double-booking conflicts, deployed on Render and Vercel.

Real-Time Chat Application | *Java, Spring Boot, React.js, WebSocket, MySQL, Docker*

- Built a real-time messaging system using Spring Boot with RESTful and WebSocket services, enabling one-to-one chat with instant delivery and managing users, messages, and sessions.
- Integrated MySQL for persistent storage of chat history with optimized queries to improve response efficiency.
- Applied Spring Security with JWT authentication and containerized the application using Docker, reducing deployment setup time and ensuring consistent environments across systems.

Education

AAA College of Engineering and Technology, Sivakasi **October 2021 - May 2025**
Bachelor of Engineering in Computer Science and Engineering *CGPA: 8.17/10*
